OSHA REGULATORY RADAR & DIRECTIVES

FEDERAL ALIGNMENT

Recent OSHA Updates and Rulemaking Actions

Staying compliant just got an update, from extended deadlines for the Hazard Communication Standard to major alignments in respiratory protection requirements. Keep your workplace up to date with this comprehensive roundup of federal OSHA changes and State Plan adoption rules.

[Explore Regulatory Matrix →](#)

Federal Directives & Arizona State Plan Process

When Federal OSHA issues new directives, state-plan states like Arizona must carefully evaluate local application. Explore the latest mandatory enforcement directives, including new National Emphasis Programs (NEPs) and voluntary cooperative updates.

Murphy's Memo: The Slippery Slope: Hidden Hazards of Type C Excavations

A common but dangerous misunderstanding in excavation safety occurs when workers stand directly on the sloped dirt face of a Type C trench. Doing so compromises the entire protective system, creating severe cave-in hazards and compliance violations that every Competent Person must recognize immediately.
